Omniversal Life Impact Program

According to the World Health Organization (WHO), approximately 2.2 billion people lack access to safe drinking water due to inadequate infrastructure and disasters.

As a leader of flexible solutions in the packaging industry, we want to contribute to the well-being of life using our business solutions. That is why FPS developed **WaterSafe** to find a solution for water insecurity all around the world.

WaterSafe by FPS

Designed to provide a cleaner, safer and easier handling alternative to the potentially contaminated jerry cans and buckets that are often used in developing countries for the transportation of water from its source as well as storage and dispensing.

Problem

Around two billion people on Earth have lack of access to safe drinking water due to geographic challenges and lack of infrastructure.

The sources they use to access and transport water are resulting in waterborne illnesses, child mortality and physical strain. Also there are difficulties to access safe water in areas suffering from natural disasters.

Solution

The WaterSafe by FPS is designed with the purpose of ensuring the safe transportation, storage and dispensing of water.

This product is tailored to meet the needs of both end users and NGOs, while reducing the carbon footprint compared to other often used solutions.

Benefits

Hygiene; with its removable liner and sealed pack design

Ergonomic; conforms the wearers body

Transport; easy to carry with equally distributed weight

Storage; flexible design, easy for logistics

Dispense; easy to use water

Sustainable; Reduce CO2 impact

Features

Fold to easily seal and open

Durable but lightweight outer material

Tap for dispensing

Removable, easy to fill, clean, and disinfect liner with 20 liter volume

Strap for hanging to use as water dispenser

Backpack straps to carry water more ergonomically

One WaterSafe, when filled with 20 liters of water, can provide safe drinking water to a class of 30.

Successful Deployment of WaterSafe by FPS

Through a partnership with a US-based NGO, **WaterSafe by FPS** has so far **positively impacted** approximately **310,000 lives** across rural areas of Kenya.

Looking for partners with equally high ambitions

The ambition of our Omniversal Life Impact Program (OLIP) is to **positively impact the lives of 25 million people by 2025.**

To realize our ambitions we are seeking support from our business partners, NGOs and GOs to **positively impact lives.**

If you see possibilities to collaborate or create a partnership, do not hesitate to contact your local sales representative, or reach out to us via
